

RetroFit Wall Outlet Quick Connect Diamond 2&3 to Ohmeda Diamond or DISS Compatible

FEATURES AND BENEFITS

- Accepts Ohmeda® Diamond or DISS Gas Specific Adapters.
- Pin indexed to prevent interchangeability of gas services.
- Each outlet is cleaned for medical gas service and pressure tested.
- Less than 3 psi (21 kPa) pressure drop through the outlet @ 120 l/min and 50 psig (345 kPa) inlet pressure.

SPECIFICATIONS

The medical gas retrofit wall outlet shall be Ohio Medical Healthcair® Series, Ohmeda® Diamond or DISS compatible. The latch-valves shall be NFPA compliant, cleaned for medical gas service and be pressure tested. Each latch-valve shall have less than 3 psi (21kPa) pressure drop through the outlet @ 120 l/min. and 50 psig (345 kPa) inlet pressure. For outlets providing positive pressure gas, the outlet shall be equipped with a primary and secondary check valve, allowing the primary check valve to be removed for service without isolating the entire zone.

Latch-valves shall be gas specific by means of a gas specific indexing pin arrangement. The indexing pin shall be arranged in such a way as to connect the latch-valve assembly only with the specific matching gas back body, preventing interchangeability of gas services.

The latch-valve assembly, which by means of color coding and wording, shall identify the specific medical gas service provided by the outlet and shall accept only Ohmeda® Diamond or DISS type gas specific adapters.

For aesthetic appeal each outlet shall include a one piece chrome trim plate.

Equipment is manufactured in the USA and produced in an ISO 13485 registered facility.
